Officers testify at various phases of criminal cases and the stakes are especially high in today's highly charged social justice environment. Cases are won or lost on the quality of the testimony of law enforcement officers. All of the effort and hours put into a good investigation can be destroyed by bad testimony.

LAW ENFORCEMENT ON THE STAND-Advanced Skills offers training in how to be a better, more effective, witness when called to testify in the courtroom today.

This course offers a deeper look at all of the basic skills learned in Basic Skills of this important training. Additionally, officers will learn how to give more effective compelling direct testimony, use persuasion techniques to testify more successfully, and to anticipate questions they will be asked by defense lawyers during cross- examination in this era of Social Justice Reform.

This course offers meaningful training on how to understand objections and use exhibits effectively. Themes, theories, and how to incorporate them into testimony will be addressed. Officers enrolling in the virtual platform will experience the same course content as the in-person format. This version requires that you use a laptop/computer with a microphone and a camera. No phones or tablets.
