

FACIAL RECOGNITION TRAINING CLASS

Facial Recognition is increasingly becoming a part of law enforcement across the country. In this 8-hour course, we will provide an in-depth view of the current state of facial recognition technology, legal aspects and best deployment practices. We'll focus on the balance between how to use this technology responsibly and successfully. The trainers of this course will demonstrate the Vigilant FaceSearch program, which is a nationwide cloud-based software with known sex offenders & millions of open-source images of LEA mugshots.

FACIAL RECOGNITION TECHNOLOGY AND BEST PRACTICES

Get the chance to work through real-world scenarios on a facial recognition database, utilizing enhancement tools with step-by-step instruction. Discover how using millions of open-source images in an established gallery complements your existing local booking images. Maximize your investigative efforts by implementing facial recognition technology and improve in almost every facet of the job, including both areas of proactive field enforcement and investigations.

At the conclusion of this class, each attendee will retain access to Vigilant LEARN with login credentials for 30 days.
